

eduroam - Connect Windows 8 RT

These instructions explain how to connect a Windows RT tablet computer (aka "Windows 8 ARM") to the **eduroam** wireless network. *If your Windows 8 computer is not an ARM / RT device you should follow these instructions instead.*

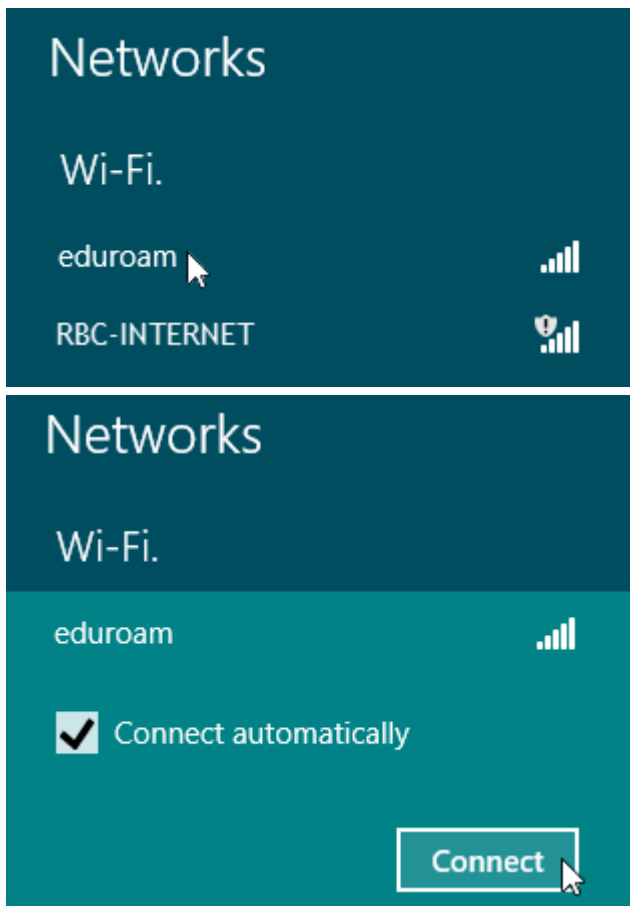

Step-by-step guide

Download and run [the eduroam Windows RT set-up wizard](#)

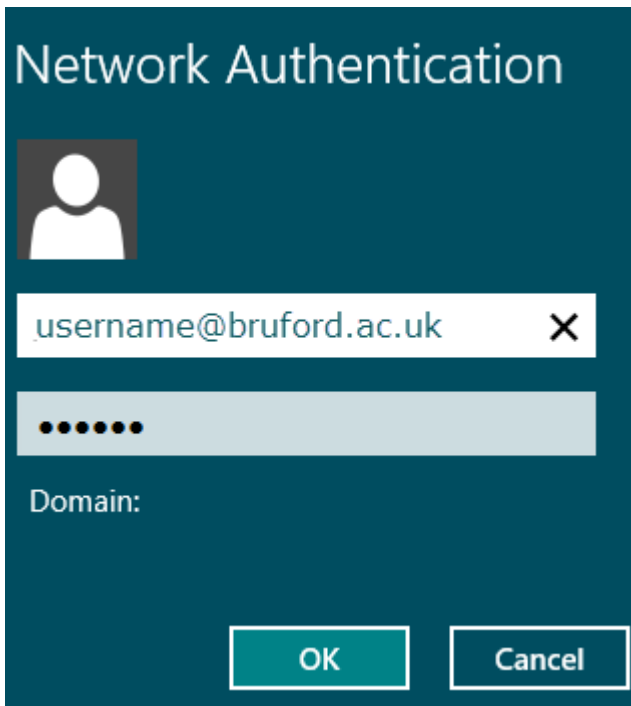

N.B. If you have downloaded the wizard in the past, delete the copy you have, and download it again from the link above. This will ensure you are using the latest version.

Click **Yes** if you are prompted about installing the **Comodo AddTrust External CA Root** certificate

Once the set-up wizard has completed, choose **eduroam** from the list of available wireless networks, and click **connect**

Enter your RBC username with **@bruford.ac.uk** on the end e.g.ab12345@bruford.ac.uk

Enter your password, and click **OK**

If you need help, please contact the [IT helpdesk](#)

These instructions will only work if you have a RBC username. If you are from a different Eduroam organisation, you will need to refer to your home organisation for the correct instructions - [click here for more information](#)
