	Incident	Who Affected	Description
122	Cloudflare issues	Various college cloud systems	<p>On Tues 2 July 2019 at 1400 hours monitoring indicated that various college cloud systems started to report 502 bad gateway errors</p> <p>This is connected to a global issue with Cloudflare</p> <div data-bbox="399 478 1359 831" style="border: 1px solid black; padding: 10px;"> <h3>Cloudflare System Status</h3> <div style="background-color: #f9a825; padding: 5px; display: flex; justify-content: space-between;"> Network Performance Issues Subscribe </div> <p>Investigating - Cloudflare is observing network performance issues. Customers may be experiencing 502 errors while accessing sites on Cloudflare.</p> <p>We are working to mitigate impact to Internet users in this region.</p> <p>Jul 2, 13:52 UTC</p> </div> <p>UPDATE 2 July 2019 at 1515 hours : update on mitigation by Cloudflare, we will continue to monitor as systems stabilise</p> <div data-bbox="399 894 1359 1199" style="border: 1px solid black; padding: 10px;"> <h2 style="color: #f9a825;">Network Performance Issues</h2> <p>Monitoring Cloudflare has implemented a fix for this issue and is currently monitoring the results.</p> <p style="text-align: center;">We will update the status once the issue is resolved.</p> <p style="text-align: center;">Posted less than a minute ago. Jul 02, 2019 - 14:15 UTC</p> </div>
121	O365 shared areas	All users of O365 shared areas	<p>On Monday 3 June 2019 at 1300 hours monitoring identified problems accessing documents located in the colleges Microsoft O365 SharePoint shared areas</p> <p>This was further identified as a problem specifically affecting our tenancy and using any Microsoft application to open/save documents. Using the online versions not effected</p> <p>We are currently investigating with Microsoft</p> <p>UPDATE 4 June 2019 at 0830 hours : monitoring indicates that the O365 shared areas problem has been resolved, we will continue to monitor</p>
120	Loss of radio channels	Estates and IT	<p>On Thursday 14 March 2019 at 0750 hours a radio repeater failed on Lamorbey campus which took down the ability for any college radios to communicate are in-place using other channels whilst we await a replacement unit</p> <p>UPDATE 15 March at 1530 hours : the repeater is back online and service to channels 3 and 4 is resumed</p>

119	VLE errors	Users in USA	<p>On Wed 13 Marc 2019 at 1630 hours our external monitoring started to report problems accessing the colleges VLE website, specifically from within the US ook/Flickr at this time, as there is external content from these services imbedded in the colleges VLE</p>  <p>We confirmed that whilst some errors were being displayed it only related to this missing content and did not affect the VLE functionality</p> <p>We will continue to monitor</p> <p>UPDATE 13 March at 1930 hours : the issue has been resolved</p>
118	SAN controller failure	All users	<p>On Tues 22 Jan 2019 at 1130 hours one of the virtual server cluster hosts went off-line. This was caused by a controller card failure in the attached storage all resilience so all service should be considered at risk</p> <p>UPDATE 23 Jan at 0830 hours : the failed virtual server was bought back online and rejoined the cluster</p>
117	Water problem in server room	All users	<p>On Sat 19 Jan 2019 at 1030 hours during routine maintenance a water leak was discovered in server room L115. This was traced to being caused by a leak</p> <p>UPDATE 21 Jan at 0800 hours : Estates dried out floor and provided temporary containment</p> <p>UPDATE 22 Jan at 1030 hours : engineer identified leak cause in AC drain pipe and implemented a permanent fix</p>
116	Wireless controller failure	Oncampus users of wi-fi	<p>On Sat 12 Jan 2019 at 0830 hours during routine maintenance checks one of the resilient wireless controllers failed after a reboot. This caused a failure of to be considered at risk</p> <p>UPDATE Mon 14 Jan at 0900 hours -efforts to recover the controller have failed so a support call has been logged to get it replaced</p> <p>UPDATE 24 Jan at 0800 hours : FortiNet engineers are investigating the cause and collected logs for further analysis</p> <p>UPDATE 28 Jan at 0800 hours : issued identified as bug 0532038 still awaiting fix</p> <p>UPDATE 6 Feb at 0800 hours : patch applied a HA cluster rebuilt, tested and normal service resumed</p>
115	Email delivery problem	Users on campus	<p>On Thurs 20 Dec 2018 at 0920 hours monitoring identified problems with users sending emails to external email addresses - they were being returned und</p>  <p>After investigation it was discovered that an on campus email server had corrupted the TLS certificates used to secure the email flow off campus to Microsoft</p> <p>UPDATE Thurs 20 Dec 2018 at 1000 hours - the problematic email server was removed from the service cluster and normal email flow resumed</p>
114	Google public DNS	off campus users	<p>On Tues 18 Dec 2018 at 0710 hours our monitoring identified issues with DNS resolution for our domain bruford.ac.uk with Googles two public DNS server</p> <p>This was confirmed as only effecting Googles public DNS servers 8.8.8.8 and 8.8.4.4</p> <p>We advise users to switch to another DNS server - like OpenDNS 208.67.222.222 whilst we resolve the issue with Google</p> <p>UPDATE Tues 18 Dec 2018 at 0830 hours - mitigating problem with Google but expect further disruption throughout day if using Googles public DNS serve</p> <p>UPDATE Tues 18 Dec 2018 at 1030 hours - issue resolved and no further disruption anticipated</p>
113	O365 SharePoint Online	All users	<p>On Tuesday 6 November 2018 at 1100 hours our monitoring indicated problems with trying to access college resources in SharePoint sites both on and off</p> <p>This was related to a Microsoft incident SP152986</p>

SP152986 - Can't access SharePoint

Status:	Service degradation	Updated:	2018-11-06 12:24 (UTC)
User impact:	Users may be unable to sign in to SharePoint Online.	Start time:	2018-11-06 10:37 (UTC)
Latest message:	Title: Can't access SharePoint		
	User Impact: Users may be unable to sign in to SharePoint Online.		
	Current status: We've determined that the directory service isn't advertising the correct time, which is causing some service components to reject authentication tokens. We're isolating the source of the error to help us find a fix for the issue.		
	Scope of impact: Any user signing in to SharePoint may experience sign-in errors.		
	Start time: Tuesday, November 6, 2018, at 8:10 AM UTC		
	Next update by: Tuesday, November 6, 2018, at 1:30 PM UTC		

UPDATE Tues 6 Nov 2018 at 1330 hours - mitigation being applied by MS

Title: Can't access SharePoint	Updated:	2018-11-06 13:21 (UTC)
User Impact: Users may be unable to sign in to SharePoint Online.		
Current status: We isolated the source of the error and forced a synchronization to ensure the correct time is advertised. We're monitoring the service while the downstream infrastructure syncs correctly. Once the sync completes, users should see access restored.		
Scope of impact: Any user signing in to SharePoint may experience sign-in errors.		
Start time: Tuesday, November 6, 2018, at 8:10 AM UTC		
Preliminary root cause: Directory services were advertising the incorrect time, preventing infrastructure downstream of the directory services synchronizing time correctly. The consequent time mismatch caused SharePoint Online authentication services to reject sign-in requests.		
Next update by: Tuesday, November 6, 2018, at 2:30 PM UTC		

UPDATE Tues 6 Nov 2018 at 1430 hours - ongoing mitigation being applied by MS

Status:	Restoring service	Updated:	2018-11-06 14:28 (UTC)
User impact:	Users may be unable to sign in to SharePoint Online.	Start time:	2018-11-06 10:37 (UTC)
Latest message:	Title: Can't access SharePoint		
	User Impact: Users may be unable to sign in to SharePoint Online.		
	Current status: While the remaining affected downstream infrastructure automatically syncs, we're forcing a sync manually on primary authentication components to expedite recovery. Users will start to see access restored once the fix reaches their infrastructure.		
	Scope of impact: Any user signing in to SharePoint may experience sign-in errors.		
	Start time: Tuesday, November 6, 2018, at 7:45 AM UTC		
	Preliminary root cause: Directory services were advertising the incorrect time, preventing infrastructure downstream of the directory services from synchronizing time correctly. The consequent time mismatch caused SharePoint Online authentication services to reject sign-in requests.		
	Next update by: Tuesday, November 6, 2018, at 4:30 PM UTC		

UPDATE Tues 6 Nov 2018 at 1620 hours - issue reported as remediated by MS, we will continue to monitor

Status: Restoring service Updated: 2018-11-06 16:18 (UTC)

User impact: Users may have been unable to sign in to SharePoint Online. Start time: 2018-11-06 10:37 (UTC)

Latest message: Title: Can't access SharePoint

User Impact: Users may have been unable to sign in to SharePoint Online.

Final status: We've completed the manual sync work on the primary authentication components, monitored the service and have confirmed that impact has been remediated.

Scope of impact: Any user signing in to SharePoint may have experienced sign-in errors.

Start time: Tuesday, November 6, 2018, at 7:45 AM UTC

End time: Tuesday, November 6, 2018, at 1:00 PM UTC

Preliminary root cause: Directory services were advertising the incorrect time, preventing infrastructure downstream of the directory services from synchronizing time correctly. The consequent time mismatch caused SharePoint Online authentication services to reject sign-in requests.

Next steps:
- We're reviewing diagnostic logs to understand why directory services was advertising a bad timestamp.

We'll publish a post-incident report within five business days.

UPDATE 4 Sept 2018 at 1400 hours : Microsoft advised known incident MO147606 is the cause

MO147606 - Unable to access Office365 services

Status: Service degradation Updated: 2018-09-04 13:06 (UTC)

User impact: Users may be unable to authenticate or connect to the Office 365 service. Start time: 2018-09-04 12:52 (UTC)

Latest message: Title: Unable to access Office365 services

User Impact: Users may be unable to authenticate or connect to the Office 365 service.

Current status: We've determined that a data center issue caused a subset of the Office 365 service to become degraded. We're connecting some of the affected services to an alternate infrastructure, while remediating the underlying issue within the datacenter.

Scope of impact: Impact is specific to a subset of users who are served through the affected infrastructure.

Start time: Tuesday, September 4, 2018, at 9:09 AM UTC

Preliminary root cause: A data center issue caused a subset of the Office 365 service to become degraded.

Next update by: Tuesday, September 4, 2018, at 2:30 PM UTC

UPDATE 4 Sept 2018 at 1530 hours : Microsoft advised further details of symptoms

MO147606 - Unable to access Office365 services

Status: Service degradation Updated: 2018-09-04 14:24 (UTC)

User impact: Users may be unable to access or use some features within the Office 365 service. Start time: 2018-09-04 12:52 (UTC)

Latest message: Title: Unable to access Office365 services

User Impact: Users may be unable to access or use some features within the Office 365 service.

More info: Users who are able to access the service may experience the following behavior:
 Exchange – Some users may be unable to access Outlook on the web. Email access through other protocols may be unaffected.
 Power BI – Users may receive "Server unavailable" error or may be unable to log in.
 SharePoint – Users may experience latency and stale search results. Further details on SharePoint mitigation can be found under the S# SP147560.
 Microsoft Teams – Users may be unable to access Office documents within Teams.
 Intune – Affected users may be unable access the Intune portal or other functionality.

Current status: We're continuing to connect the affected services to an alternate infrastructure, while remediating the underlying issue within the datacenter.

Scope of impact: This issue could potentially affect any of your users who are hosted out of the San Antonio data center. Impact is specific to a subset of users who are served through the affected infrastructure.

Start time: Tuesday, September 4, 2018, at 9:09 AM UTC

Preliminary root cause: A data center issue caused a subset of the Office 365 service to become degraded.

Next update by: Tuesday, September 4, 2018, at 4:30 PM UTC

UPDATE 4 Sept 2018 at 1630 hours : Monitoring reporting services returning to normal

Private Peering with China Telecom	Down	Down since 08/05/2018 08:18 BST
TeliaSonera (Global Transit) via HX	Down	Down since 08/05/2018 08:21 BST
TeliaSonera (Global Transit) via THN	Down	Down since 08/05/2018 08:18 BST

This result in loss of internet access to certain parts of the world and also effecting external users trying to access services on campus

UPDATE 8 May at 0935 hours; services returned to normal

103 **MyAthens login error** Users trying to access MyAthens

On **20 March 2018 at 0345 hours** our monitoring reported problems accessing the **myAthens** home page after logging in openAthens - returns a **HTTP 500**

This error was logged with **EduServ** as it seems to only affect accessing the myAthens site not authentication or resources

UPDATE 20 March at 1100 hours - site back online

102 **Problems accessing college resources off campus** Users based in USA and Australia

On **20 March 2018 at 0738 hours** our external monitoring report problems with users accessing college web resources from locations in the USA and Austr
