

## **FAQ: Student OWA email not functioning properly (Office 365)**

If you find that you are unable to send, open or read attachments after logging into your college Office 365 OWA email using a web browser, this is due to a problem with the web browser you are using

Whilst Office 365 OWA is able to be used with all web browsers, sometimes additional plugins from other websites can interfere with how some of the advance functionality is or is not displayed when using your student email

We would suggest trying another web browser or another computer to confirm the problem is browser related and then either re-installing the web browser that is not working or continue to use the one that does
